INDEX OF AUTHORS

BAGLIA, F. A. 69
BANYARD, M. R. C. 45
BAUMBACH, G. A. 1
BISHOP, D. L. 87

DENNIS, M. V. 121
DENNY, J. B. 1

FITZGERALD, L. A. 1

GARROD, D. R. 171, 189

HEIFETZ, A. 121
HIPKE, H. 203

JORDAN, E. G. 217

KETCHAM, C. M. 1
KING, R. C. 87

LU, B. C. 25

MATTEY, D. L. 171, 189
MAUL, G. G. 69

NEWMEYER, D. D. 69

OHLSSON-WILHELM, B. M. 69
OSBORN, I. W. 159

PARISH, C. R. 145

ROBERTS, R. M. 1
RYLATT, D. B. 145

SCHMIDT, W. 203
SEYFERT, H.-M. 203
SNOWDEN, J. M. 145

WATSON, C. B. 121
WEISS, R. L. 133
WHITE, M. K. 45, 63
WOOLLEY, D. M. 159

INDEX OF SUBJECTS

Adhesion
role of fibronectin in cultured corneal epithelial cells: MATTEY & GARROD 189
role of glycosaminoglycans and collagen in cultured embryonic corneal epithelial cells: MATTEY & GARROD 171
Amino acid transport
in hybrids between malignant and non-malignant cells, kinetics: WHITE 63
Anion transport
association with membrane protein: BANYARD & WHITE 45
Axoneme
torsion, in sperm motility: WOOLLEY & OSBORN 159

Border cells
in oocytes of *otu*^{7} mutant of *Drosophila*: BISHOP & KING 87
Butyrate
effects on production of sulphated glycoproteins by human kidney tumour cells: DENNIS, WATSON & HEIFETZ 121

Cellular program
for formation and dissolution of synaptonemal complex in *Coprinus*: LU 25
Chlamydomonas
gametes, ultrastructure of flagellar roots: WEISS 133
CHO cells
mutants in membrane glycoprotein study: FITZGERALD, DENNY, BAUMBACH, KETCHAM & ROBERTS 1
Chorion
in oocytes of *otu*^{7} mutants of *Drosophila*: BISHOP & KING 87
Collagen
role in development of extracellular matrix in cultured corneal epithelial cells: MATTEY & GARROD 171
Coprinus
synaptonemal complex, cellular program for formation and dissolution: LU 25
Corneal epithelial cells
cultured, development of fibronectin-rich extracellular matrix: MATTEY & GARROD 171
extracellular matrix organization and role of fibronectin in adhesion: MATTEY & GARROD 189
Cytoskeleton
of *Chlamydomonas* gametes, ultrastructure: WEISS 133

Drosophila
ovarian development in ovarian tumour gene mutants: BISHOP & KING 87

Electron microscopy
nucleolar nomenclature proposed: JORDAN 217
Extracellular matrix
organization by cultured chick embryonic cells: MATTEY AND GARROD 171

Flagellar roots
of microtubular system in *Chlamydomonas* gametes: WEISS 133
Flagellum
of hamster sperm, three-dimensional geometry: WOOLLEY & OSBORN 159
Fibronectin
-rich extracellular matrix, development in culture corneal epithelial cells: MATTEY & GARROD 189
role in adhesion of cultured corneal epithelial cells: MATTEY & GARROD 171

Glucose transport
association with integral membrane protein: BANYARD & WHITE 45
Glycoprotein
in nuclear membrane of clam oocyte: MAUL, BAGLIA, NEWMEYER & OHLSSON-WILHELM 69
Glycosaminoglycans
role in fibronectin-rich extracellular matrix in cultured corneal epithelial cells: MATTEY & GARROD 189

Lamin
-like protein in clam oocyte nuclear envelope: MAUL, BAGLIA, NEWMEYER & OHLSSON-WILHELM 69
Lectin-resistant mutant
of CHO cells in study of effects of changes in carbohydrate structure on membrane glycoprotein dynamics: FITZGERALD, DENNY, BAUMBACH, KETCHAM & ROBERTS 1
Lectins
on lymphocyte surface that recognize sulphated polysaccharides: PARISH, RYLATT & SNOWDEN 145

Lymphocytes
containing surface resins that recognize sulphated polysaccharides: PARISH, RYLATT & SNOWDEN 145
Lysosomes
in ovarian development in *otu*^{7} mutant of *Drosophila*: BISHOP & KING 87

Macronuclear DNA content
relationship to size in *Tetrahymena* mutants: SEYFERT, HIPKE & SCHMIDT 203
Membrane glycoproteins
of CHO cells, effects of altered carbohydrate structure: FITZGERALD, DENNY, BAUMBACH, KETCHAM & ROBERTS 1
Membrane protein
association with glucose and anion transport: BANYARD & WHITE 45
Monoclonal antibodies
in identification of major structural protein in clam oocyte nuclear envelope: MAUL, BAGLIA, NEWMEYER & OHLSSON-WILHELM 69
to glycoproteins in study of effects of altered carbohydrate structure on CHO cell membranes: FITZGERALD, DENNY, BAUMBACH, KETCHAM & ROBERTS 1

Nuclear envelope
of clam oocyte, lamin-like 67 000 M_r protein: MAUL, BAGLIA, NEWMEYER & OHLSSON-WILHELM 69
Nucleolus
nomenclature: JORDAN 217

Oligosaccharides
changes in structure, effects on membrane glycoprotein distribution and turnover in CHO cells: FITZGERALD, DENNY, BAUMBACH, KETCHAM & ROBERTS 1
Oocyte
of clam, lamin-like protein in nuclear envelope: MAUL, BAGLIA, NEWMEYER & OHLSSON-WILHELM 69
Oogenesis
in *otu*^{7} mutant of *Drosophila*: BISHOP & KING 87
Ovarian tumour gene
mutant in *Drosophila*: BISHOP & KING 87

Receptors
on lymphocyte surface recognize polysaccharides: PARISH, RYLATT & SNOWDEN 145
Ribosomal DNA
not demonstrated by electron microscopy: JORDAN 217

Size mutants
of *Tetrahymena*, isolation and characterization: SEYFERT, HIPKE & SCHMIDT 203
Sperm motility
three-dimensional geometry: WOOLLEY & OSBORN 159
Striated fibres
in cytoskeleton of *Chlamydomonas* gametes: WEISS 133
Sulphated glycoproteins
of human kidney tumour cells: DENNIS, WATSON & HEIFETZ 121
Sulphated polysaccharides
recognized by lymphocyte surface lectins: PARISH, RYLATT & SNOWDEN 145
Synaptonemal complex
in *Coprinus*, cellular program for formation and dissolution: LU 25

Tetrahymena
size mutants, isolation and characterization: SEYFERT, HIPKE & SCHMIDT 203
Tumour cells
of human kidney secrete glycoproteins containing sulphated complex-type oligosaccharides: DENNIS, WATSON & HEIFETZ 121

Vitellogenesis
in *otu*^{7} mutant of *Drosophila*: BISHOP & KING 87
